## Healthcare Seating

Rocker/Glider

Comfort, form and function are the essential building blocks for any HPFI® product. Nowhere is this more critical than in a healthcare setting where patient comfort is essential to maximize relaxation and recovery while simultaneously providing caregivers with equipment that looks great and performs flawlessly.

The new **Hannah Rocker/Glider** provides a fluid, gliding motion ideal for parents with infants and memory care patients who find great comfort in motion. Separate hand-operated controls operate the footrest and enable/disable the glider motion. Offered in a more contemporary taut upholstery and a traditional pillow back version. Stylish legs in the front and durable casters in the back are integral components of the heavy duty recliner mechanism.
