## HPFi<sup>®</sup> Introduces Rokkitt Active Stool

HPFi (High Point Furniture Industries) is pleased to announce the introduction of the [Rokkitt Active Perch / Stool](#). **Rokkitt** is an adjustable, pivot and swivel perch providing active, rocking motion. Designed to offer the ideal height active seat to accompany most table, desk and dining heights, **Rokkitt** is a natural and perfect companion for sit-to-stand work areas.

**Rokkitt** features a broad rounded rectangular-shaped base allowing a +/- 20 degree pivot. The similarly shaped seat swivels 360 degrees and enables a rocking motion side to side or front to back. The 9" travel pneumatic gas lift provides a seat height of 21" to 30". Two (2) independent actuator buttons on the underside of the **Rokkitt** seat make height adjustments easy. **Rokkitt** also features a non-slip, anti-squeak rubberized base for use on any floor surface.

"**Rokkitt** represents our next level addition of flexible seating" said Doug Gaines, Vice President of Sales for HPFi. "Alternative seating options are important in today's learning and work environments. **Rokkitt** complements these areas by offering the perfect flexible seating solution while enhancing individual movement."

**Rokkitt** is accessible on the [HPFi web site](#) through the [Office Seating](#) link under "Products". Several assets to support the marketing of **Rokkitt** included on the [web page](#) including cutsheet, list pricing, specification document and product planning symbols.

HPFi operates manufacturing facilities and a 4,100 sq. ft. showroom in High Point, North Carolina. With roots in High Point, the furniture capital of the world, HPFi combines the skill and expertise of seasoned furniture craftspeople with modern day technology to deliver exceptional value to its customers.
