# Statement of Compliance

## Product Safety - Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS)

HPFi® (High Point Furniture Industries) is pleased to report its compliance with legislative actions under consideration in thirty-one states and already passed in California, Maine, Massachusetts and Minnesota. The legislation addresses PFAS (fluorocarbon) chemicals which have historically been in textile finishes for stain- and water-resistant properties.

Contract fabric mills and distributors are working to eliminate “intentionally added” PFAS, but the transition is not complete. Most of HPFi’s fabric partners have already included “PFAS-Free” in their fabric search options as they transition all their textiles to be free of fluorocarbons. The target date for most states’ legislation is January 1, 2025.

The most recognized legislation is California Assembly Bill 1817. It prohibits, beginning January 1, 2025, the “sale of any new textile articles that contain regulated PFAS and requires a manufacturer to use the least toxic alternative when removing regulated PFAS in textile articles to comply with these provisions.” AB 1817 does apply to HPFi upholstered commercial furnishings.

Therefore, this document serves our business partners who sell HPFi upholstered products within the state of California as a “certificate of compliance” that the textile fabric follows these provisions and does not contain PFAS.
