Adjustable Height

We've been hearing that "sitting is the new smoking". Sitting for long stretches every day does have a number of health consequences. The latest implication is that more time you spent sedentary can impact your brain health as well as physical health. You don't have to move very much - just standing can help.

Standing can increase blood flow to the brain to facilitate thinking. But doing office or school work while standing conflicts with what we were previously taught. Maybe it was wrong to "sit down and focus". Maybe it is time stand up and **Boost** your creativity and thinking.

### CHARACTERISTICS

- Single stage leg adjusts from 28" - 47" overall table height
  - Dual stage leg adjusts from 25" - 49" overall table height
  - Travel speed of 1-3/8" per second
