Timbre

Seating

Breakroom · Collaborative · Guest

Timbre seating features polypropylene seat and back engineered for comfort. The open design of the back not only is aesthetically pleasing, but offers a cool, breathable back surface. The two-piece clam shell construction of the seat also ensures a comfortable respite for longer-than-expected conversations.

Timbre is available in three models - a stool ideal for use at a **Matrix** touchdown table or behind an **Eve** banquette with optional shelf, a leg chair great for use at a **Clique** table or leg chair with casters perfect for use with **Duality** training tables.

Select any upholstery from the HPFi core suppliers or COM (customer's own material) to soften the aesthetics with the comfort of a seat pad.
