

# Duality

## Training Tables

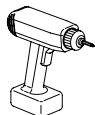

Flip Top

HPFi

## Tools Needed

- Phillips screwdriver (manual or power)

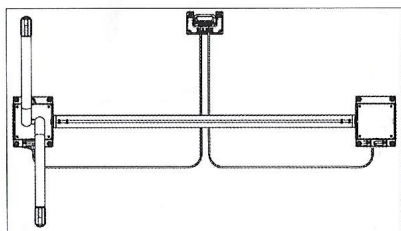

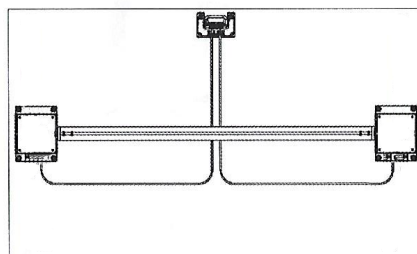

## Hardware Provided

- Eight (8) #12 x 1" Phillips pan head screws

## Step 1

Place the work surface (top) bottom side up on a smooth, clean, non-marring surface.

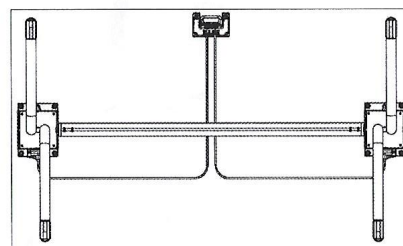

## Step 2

Place one of the leg assemblies on the mounting plate pre-attached to the underside of the work surface. Align the four (4) holes on the two (2) mounting plates and secure with four (4) #12 x 1" pan head machine screws.

## Step 3

Place the remaining leg assembly on the remaining mounting plate on the underside of the work surface. Align the four (4) holes on the two (2) mounting plates and secure with four (4) #12 x 1" pan head machine screws.

## Step 4

With a friend to assist you, turn the table upright onto the floor. You are ready to start using your Duality table!
