

Harmony

Convertible Day Bed

Step 1. Opening

Lift the chair seat to unlock the back from the upright position. This will also reveal the storage area underneath. Pull the base (seat and storage area) away from the back. The back will “unfold” as the base rolls forward.

Step 2. Use

With the base fully extended, the back will be completely flat and even with the seat when it is closed. This will provide a 78” long bed with the storage area secured below the sleeping area.

Step 3. Closing

Lift the back of the chair at the pivot point as shown. The seat and storage area will roll back to close. Be careful to not pinch your hand between the 2 sections of the back as it closes. When fully closed, the back will again lock into the upright chair position.
