Warranty

This Tripod product is warranted for a period of one (1) year from the date of purchase.

This warranty is null and void in the case of abuse, uses outside its normal intended use, or field modifications made in any manner.

Introduction

Congratulations on your purchase of the HPFI PowerFlex Tripod. This product is ideal for any environment where competition for traditional wall power outlets is a challenge.

Who We Are

High Point Furniture Industries was founded in 1958 and remains a privately held, veteran-owned business. The first products were novelty furniture items for the home (TV stands, record cabinets). High Point entered the office furniture market in 1963 with the introduction of the first budget-priced wood desk, 100 Series. Up to that point, low-cost desks were made primarily of metal; wood desks were significantly more expensive. Today, our operations include two manufacturing facilities with over 440,000 sq. ft. in High Point, NC where we produce 19 different series of veneer and laminate casegoods and over 60 series of reception, office and healthcare seating products.

Product Overview

The Tripod incorporates nine-120v 15 Amp tamper resistant power receptacles and six low voltage, (5 Volt DC), active USB ports. Capable of being relocated at will, the six rubber feet prevent sliding and provide clearance and stability on uneven surfaces or over floor boxes. In the event you would like the unit applied in a more permanent setting, mount or tether points are accessible on the bottom of the unit. When the Tripod is not in use the cord stores seamlessly in the base and is held in place by the magnetic catch.

Appendix

Specifications

- **Power Requirement**: 120 VAC, 12A
- **Certification**: ETL Certified
- **Weight**: 25 pounds
- **Measurements**: 25.50” tall x 18.00” at the widest point
- 9 Tamper Resistant receptacles
- 6 Active USB charging ports.
- 9’ Power cord.
- Circuit breaker for overload protection.
- No-Slip rubber feet provide 0.75” floor clearance.
- Magnetic catch secures cord when not in use.
- Recesses in base allow Tripod to be tucked up close with floor boxes when plugged in.
- Slots in the base allow unit to be tethered to the floor or a pole if stationary application is desired.
- Tri-core design allows for 360 degree power access.

Cautions & Warnings

WARNING: FAILURE TO FOLLOW CAUTIONS AND WARNINGS BELOW COULD RESULT IN ELECTRICAL SHOCK, FIRE, PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

Cautions:

- Read Instructions · Read all warnings and operating instructions before using.
- Retain Instructions · Retain this Owner's Manual for future use.
- Never use in a wet environment. Never allow liquid of any kind to spill onto or enter any part of the product.
- Follow Warnings· Read and follow all warnings and instructions in this Owner's Manual and marked on Equipment.
- Service · There are no user serviceable parts in this product unless described in the following pages. Do not open or modify this product in any manner.

Warnings:

- Power Source · This product is only to be operated from the power source indicated on the product. Use only with a grounded (neutral) conductor. For safety do not bypass or disable the third (grounding) pin.
- Power Disconnection · To remove powered devices safely grasp device plug and pull straight from powered outlet. Do not pull on device cord or remove plug from any angle other than straight from outlet. Never touch metal conductors on plug during connecting or removal from product.
- Power Cord · Route products power cords where they will not be stepped on, pinched, have devices placed on them or become a tripping hazard. Never allow power cords to sit in any liquid or get wet in any manner.
- Location · This product is intended to be used in a dry environment only.

Quick Start Guide

HPFI invested a great deal of time ensuring that the user experience with the Tripod is a satisfying one. Installations are fast and easy, remove the Tripod from its package, place the unit where desired, uncoil enough cord to reach your wall or floor outlet and plug in the Tripod. It is that simple to get started with this flexible power Tripod!

Installation & Operation

1. Remove the Tripod from its packing.
2. Place Tripod at location for use. Tripod can be plugged into a power source from either a floor or wall location. (Note: Ensure cord doesn't become a tripping hazard when in use.)
3. Disengage the magnetic catch and uncoil cord from base and plug into power source. Uncoil only as much cord as needed to make a safe connection.
4. Plug power or USB devices into the Tripod as needed.
5. To store the unit, wind the cord between the base plates and engage the magnetic catch to the top plate.
