

**Hyperwork Education** provides modular storage furniture for the classroom. Cubby storage modules are designed to create perimeter storage and auxiliary seating within the K-3 classroom. Cubby storage is offered in 2-, 3- and 4-level heights ideal for elementary and middle schools.

Cubby storage units and lockers can be adapted to the specific needs of individual classrooms by adding doors to conceal or secure personal items. The addition of shelves transforms the storage area into bin or tub storage for younger students.

Locker cabinets with or without doors in single, double or triple widths with finished backs offer a flexible and modular approach as room dividers or for band dressing or locker rooms.

## Cubby Storage
