HPFi

High Point, USA

July 1, 2026

Dear Valued Customer,

We greatly appreciate your business and the trust that you place in us at HPFi.

We have worked diligently in the past year to control significant increases in operating costs across our business, including raw materials, transportation, utilities, labor and employee benefits. Our goal has always been to minimize the impact of these rising costs on our customers while continuing to provide the quality products and service you expect.

Despite these efforts, the continued escalation of costs has made it necessary for us to implement a selective price adjustment. Rather than applying a broad increase across our entire product line, we have carefully evaluated the impact of these cost increases and have chosen to adjust pricing only on those products most significantly affected.

Effective August17, 2026, prices on the affected products will increase by 6%. This targeted approach allows us to limit the adjustment to specific items while maintaining current pricing on products where cost pressures have been less significant. You will be pleased to know that there will be no increase for our best-selling product lines.

We remain committed to delivering exceptional value, quality, and service, and we appreciate your understanding as we take this necessary step to ensure our ability to continue meeting your needs.

Click here for the list of product lines impacted by the 6% increase as well as those products being discontinued.

If you have any questions regarding the affected products or the upcoming price adjustment, please contact your sales representative.

Thank you for your continued partnership.

Sincerely,

Jerry Samet
President
